

COMPANY PROFILE

❖ Our Company: -

Three Dimensions Engineers is established in the year 2012 at Ahmedabad (Gujarat - India) and is highly involved in dealing in old and new machinery of a wide array of Industrial Machines and Grinders. Our wide range of products includes Boring Machine, VTL, Cylindrical Grinding Machine, Floor Boring Machine, Plano Miller, SPM Machine and Surface Grinder. The Company has started doing CNC atomized by retrofitting new CNC manufacturing and manual machines. We ensure the best raw materials being used in these products.

❖ Promoter and Founder Mr Mukesh Sheth: -

- ❖ Mr Mukesh Sheth initiated his career by joining business tycoon 'RELIANCE TEXTILE INDUSTRIES' {RIL}, Naroda (Ahmedabad) in the year 1979. From 1979 to 1982 worked as a helper and from 1982 to 1992 worked as maintenance in charge and gained all rich experience about the machinery during his tenure with the Reliance.
 - ❖ From 1993 to 1994 He was associated with M/s Union Bearings India Limited', Ahmedabad. He was performing his duty as Manager at the manufacturing plant of the Company situated at Porbandar and provided valuable technical know-how to the management of the Company. The area which was being looked into by Mr Mukesh Sheth was maintenance, production, quality control, labor control and development.
 - ❖ From 1995 to 2002 He was engaged with some mid-sized private companies for maintenance and retro-fitting, SPM (Specific Purpose Machine), Bearing Marking Machine, Elevator Part, Bearing Manufacturing, Factory Consulting, Windmill, Power Production, Planning, Setting etc.
 - ❖ From 2002 to 2012 He worked as Third-Party Inspection, paid attention towards the selling of old new workshop machinery and looked after the factory problem solutions.
 - ❖ The year 2012 he established owned entrepreneur Three Dimensions Engineer
-

❖ **At Present** imported workshop machines are being traded in Three Dimensions Engineers and retrofit work is being done by doing automatization of manual machines, Also New Customized machinery are being manufactured which are as follows: -

-
- CNC VTL 400 mm to 4000 mm Chuck
 - CNC Boring
 - CNC floor Boring
 - VMC
 - HMC
 - CNC Turning
 - CNC Plano Miller
 - CNC Wood Working Machine
 - SPM (Special Purpose Machine) as per customers need.

❖ **Proposed and Estimated Turnaround for the next two Years: -**

Based on our experience. Sales and Marketing Network, we at present anticipate selling of 2 to 3 CNC Machines, which requires the investment of approximately Rs.1 Crore to Rs.1.5 Crore. We envisage the demand of Machines will be increased based on current market scenario hence we expect to reach business turnover of Rs. 10 in the next 18 to 24 months.

❖ **Beyond the above, the Company proposes to commence the production and dealing in the below mentioned new segments: -**

» E-Cycle » E-Bike (Two and Three-wheelers) » E-Auto Rickshaw (Three-Wheeler) »
E-Loading Rickshaw » E-Parcel Tempo (Four-wheeler) » Two-seater mini car
» Fast Battery Charger

Most Importantly four-wheeler Battery fitted and paddle cycle with lighting and banner for E-Advertisement.

Looking into the current situation of Covid-19, to create the new product by affixing sanitizing and Foggier Machine in E-Rickshaw.

We are proposing to set up another large unit as a **START-UP** after getting sample approved from the government based on **R&D** as stated hereinabove.

Thanks, and Regards,
Mukesh Sheth
